

GIT & GITHUB HANDS-ON ASSIGNMENT (Part 2)

You already have the first part of your developer profile if you have completed your first assignment. Go to <https://github.com/YOUR-GITHUB-USERNAME> to see it

Task 1 — Update your GitHub profile

Edit the README.md file locally using Markdown on your VSCode. Your README must contain the following sections:

- 1. Introduction:** Write your name and a short introduction about yourself.
- 2. About Me:** Write 3–5 sentences describing your interests, background, or career goals.
- 3. Skills:** Create a Markdown list of at least five technical skills or technologies you are learning.
- 4. Tools:** List at least three development tools you use, such as VS Code, Git, GitHub, or a terminal.
- 5. Current Learning:** Mention at least two technologies, concepts, or areas you are currently learning.
- 6. Contact:** Add a professional way for people to contact or connect with you, such as LinkedIn or another appropriate profile.
- 7. Github stats:** Add github stat graph by pasting this

```
<p align="center">
```

```

```

```
</p>
```

Resources

1. Markdown cheat sheet - <https://www.markdownguide.org/cheat-sheet/>
2. Emojis - <https://emojipedia.org/>

Markdown Requirements

Your README.md must demonstrate the use of at least the following Markdown features:

- Main heading using #
- Subheadings using ##
- Bold text
- Italic text
- Lists
- At least one hyperlink

Task 2 — Commit and Push Your Work

1. Save your changes
2. Push your changes to GitHub. (no need to set origin again because you already did that during the first push so just run ``git push origin main``)
3. Open your GitHub profile repository in a browser and confirm that your README is displayed correctly.
